Regulatory Services
Inspection Report Form
Food Hygiene (England) Regulations 2006

Summary

1. The level of illumination needs to be improved in the small room to facilitate effective cleaning and inspection. I advise that a strip light is installed.
2. Remove the flaking paint from the ceiling within the canopy and redecorate. Until this is done ensure pans etc are protected from potentially falling paint particles as discussed.
3. High level cleaning is required to the pipework to remove the dust and fluff.

Recommendation

1. Reinstate the probe calibration as discussed during the inspection.
